Solar Energy Master Course in connection with EuroSun 10 Congress in Graz

Dear colleagues,

as in recent years, we plan to organize a solar energy course open for all master students from interested (European) universities in connection with the EuroSun 2010 Congress in Graz (AT), 28.Sept.-1.Oct. 2010, see www.eurosun2010.org. The period of the course is 15.Aug.– 3.Oct. 2010. From 26.Sept. to 3.Oct. the students will be in Graz . Due to the cooperation of the organizers of the EuroSun 2010, the participation in the conference will be (nearly) free of charge for the students. The number of students attending the course is limited to 20.

For further information and for registration please visit www.solar.uni-kassel.de/solnet/eurosun10/

The course is conducted by Prof. Wolfgang Streicher (TU Graz, AT) and Prof. Klaus Vajen (Uni Kassel , DE). Each participating university must have a supervisor responsible for the course at the university in question. The supervisor shall arrange that the course (3 ECTS-points) will be accepted by the university and take care of all administrative matters related to the course at the university in question. Also, the supervisor shall encourage students to participate in the course. It is expected that the supervisors will assist the students in connection with their preparations. It is appreciated, if the supervisors attend the congress and the student presentations in Graz.

We hope that you are interested to take part in the course as a supervisor for your university, so that the participating students will be a truly international group.

- Please register as a supervisor at www.solar.uni-kassel.de/solnet/eurosun10
- Please inform your students about the course, e.g. by forwarding this email
- Please forward this email to colleagues who might be interested as well
